

NOTICE OF PUBLIC MEETINGS

Spring Creek Flood Control Dams Feasibility Study

The San Jacinto River Authority (SJRA) will hold two public meetings on Monday, April 21, 2025, from 6 p.m. to 8 p.m., at the Field Store Community Center located at 26098 FM 362, Waller, Texas 77484 and Monday, April 28, 2025, from 6 p.m. to 8 p.m., at The Woodlands Township located at 2801 Technology Forest Blvd., The Woodlands, Texas 77381, to discuss the Spring Creek Flood Control Dams Feasibility Study.

The Spring Creek Flood Control Dams Feasibility Study is a continuation of the Spring Creek Siting Study, a sub-task of the San Jacinto Regional Watershed Master Drainage Plan project (SJMDP) led by Harris County Flood Control District (HCFCD) and supported by multiple partner agencies including the San Jacinto River Authority (SJRA). The Spring Creek Siting Study explored multiple alternative projects and detention siting locations to provide flood mitigation benefits to the Spring Creek watershed. Two of the more cost-effective alternatives identified by the SJMDP were dams on Walnut Creek and Birch Creek. The Spring Creek Flood Control Dams Feasibility Study includes conceptual-level design for each of the two dams, as well as definition of benefits and costs for each dam and a combination of the two dams. The outcome of this study will allow project sponsors to determine the most feasible and economical alternative(s) for possible future design and construction. The study is funded by the Texas Water Development Board (TWDB), Harris County Flood Control District, City of Humble, and five (5) Municipal Utility Districts, with in-kind services being provided by SJRA.

The meetings will be in an open-house format, allowing members of the public to come and go at their convenience at any time between 6:00 p.m. and 8:00 p.m. A short, high-level presentation summarizing study results to date will be given at 6:30 p.m. and 7:15 p.m. at each meeting. Members of the project team will be available before and after these presentations to collect input and answer questions from members of the public.

Comments will be accepted before, during, and following the meetings. Comments may be emailed to floodmanagementdivision@sjra.net or submitted online at www.SpringCreekStudy.com.
